The exploration contracts would be production-sharing contracts with a contract period, in case of crude oil and associated gas, of upto '25 years. Companies are exempted from payment of bonuses and statutory levies. The Government .of India would have the first right of refusal in respect of the oil produced urdu these contracts, with companies being paid for their share of oil at international price. Provision for participation by ONGC/OIL in the venture at the exploration and/or the development stage has been made and ONGC/OIL could have a participating interest of 30% to 40% in the venture. Provisions have also been made for the development of commercially exploitable natural gas resources.

The medium-sized fields are to be developed by the private companies in joint venture with ONGC/OIL while the small-sized fields would be developed by private companies on their own without any participation by ONGC/OIL. These fields are to be developed under the production-sharing arrangements with statutory levies like royalty and cess being payable.

(c) The quantity of oil likely to be extracted would depend upon the size of commercial discovery of hydrocarbons in case of exploration blocks and on the extent of reserves and work programme implemented for exploiting medium/small sized fields.
